

**CASE STUDY:  
AETHRA TEST EQUIPMENT AT SLOVAK TELECOM**

**Customer interviewed: Slovenské telekomunikácie, a.s**

**Equipment Used: D2000 Pro™ Tester**

Slovenské telekomunikácie, a.s., provides its customers with a wide range of ISDN products. In order to guarantee a comprehensive and high-quality service, Slovenské telekomunikácie needed to find an easy-to-use and reliable method of testing its ISDN services.

Slovenské telekomunikácie announced an international tender in order to ensure the supply of the most suitable equipment and ELDI s.r.o., Aethra's distributor in Slovakia, made a successful bid.

“There are a number of reasons why Slovenské telekomunikácie have chosen Aethra D2000 Pro.” explains Ing. Michal Píala of Slovenské telekomunikácie, a.s., and continues: “The offer had an extremely good performance/price ratio, and the equipment provides many features, which make different testing methods easier.”

For the specialists at Slovenské telekomunikácie, the Aethra D2000 Pro ISDN analyser is a concrete response to all problems related to ISDN. Its innovative technology allows a complete analysis of the basic rate ISDN access (with S/T – BUS and U interface features) and of the primary rate ISDN access.

The equipment simplifies the whole installation thanks to its intuitive multi-language user interface. ELDI provided short training to all users, so the staff of Slovenské telekomunikácie, a.s., now use the equipment both effectively and professionally. Thanks to its clear graphic display, users can see whether an ISDN connection is active or whether there are problems. The equipment ensures fast and easy troubleshooting.

## Advantages of the D2000 Pro analyser

- ISDN analyser and tester (basic and primary rate access)
- Compact handheld device with exclusive design
- Intuitive multi-language interface
- Graphic back-lit display with excellent image resolution
- Simulation and monitoring features on both PRI and BRI accesses
- Fast setup
- Test result storage
- PC interface

Aethra offers a comprehensive range of testing and measurement equipment, from a simple, accurate and complete ISDN tester D2001NX to D2000 Pro and an innovative D2061 ADSL tester, the smallest hand-held tester on the market and the first to simulate and replace a DSL modem in a network.
